Water Department
Emergency Public Service Announcement
“Water Let Run Due to Frost Levels”

Please run as soon as possible and until further notice.

“The City of Crystal Falls is issuing an emergency water “let run” order due the dangerously increasing frost levels.

The City of Crystal Falls is asking all water customers to run one faucet inside their home or business in a continuous, steady stream between the thickness of a pencil lead and a pencil until further notice.

Please note that the City of Crystal Falls will bear the extra cost of this let run order. City water customers bills will only be charged according to the average of their last 3 months water use during this let run period.

City of Crystal Falls water customers will need to continue to let their water run until notified not to. If a water customers water line freezes during this time, they will be charged a fee to have it thawed.

The City of Crystal Falls asks city water customers to inform their neighbors, friends, and relatives that are city water customers and who may not get this message.

The City of Crystal Falls appreciates your help and cooperation with this matter.

For more information or questions, please contact City DPW Foreman Kelly Stankowicz at (906) 875-3212, ext 106.”
